The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the at least one interior member" in line 12. There is insufficient antecedent basis for this limitation in the claim.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Apps et al. ('279) (Apps) in view of Hammett ('554) (Hammett), McGrath ('844) (McGrath) and Sauey.

Apps discloses the invention except for the internal columns appear to be the same height as the wall structure. Hammett, McGrath and Sauey teach internal columns of shorter height than the wall structure. It would have been obvious to modify the height of the internal columns to be shorter than the wall structure to provide wider access to an upper portion of the bottle located within a pocket so that a user could grasp a larger portion of the bottle's exterior ensuring a firm grasp of the bottle before it is lifted from the tray.

Claims 1-10 and 12-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Apps et al. ('793) or Apps et al. ('002) in view of Hammett ('554) (Hammett), McGrath ('844) (McGrath) and Sauey.

Art Unit: 3727

The Apps references disclose the invention except for the internal columns appear to be the same height as the wall structure. Hammett, McGrath and Sauvey teach internal columns of shorter height than the wall structure. It would have been obvious to modify the height of the internal columns to be shorter than the wall structure to provide wider access to an upper portion of the bottle located within a pocket so that a user could grasp a larger portion of the bottle's exterior ensuring a firm grasp of the bottle before it is lifted from the tray.
